Angleboard

Cornerboard

RECLAIM • RECYCLE • REUSE

Cornerboard™ is a high-strength, moisture-resistant corner post made of recycled paper and plastic with a paper outer wrap. The plastic content enables Cornerboard exposure to moisture for long periods of time without deteriorating, making it ideal for products that are shipped on flat bed trucks, stored outdoors, or exposed to high humidity.

Cornerboard:

- Delivers greater strength than conventional paper products
- Offers more pieces per pallet which reduces freight and storage costs
- Works well with refrigerated/frozen food where condensation is a problem
- Easily accepts nails, staples and screws
- Is recyclable and reclaimable

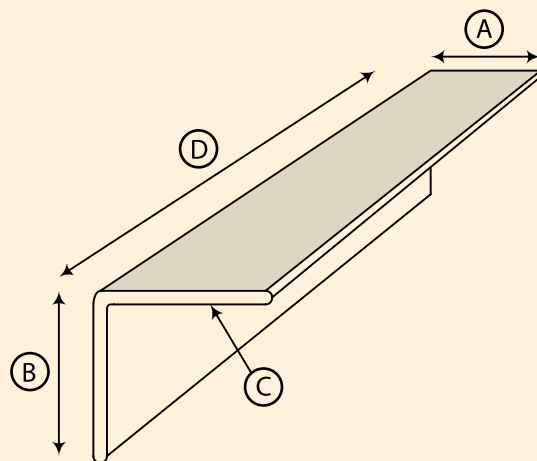

One and two-color printing is also available for branding, product identification and instructional purposes.
