- Fast and professional cleaning, service, & repair performed by industry experts
- Free return shipping on ALL tools

As a long time distributor of Signode, Samuel Strapping Systems and Wulftec, **LINC** Systems has the strapping product knowledge and technical expertise to provide polypropylene, polyester, steel, woven and cord strapping solutions for the most challenging strapping applications.

We offer an extensive line of strapping equipment ranging from manual hand tools to fully automatic strapping systems.

SIGNODE SGP SERIES

Plastic strapping machines offer a fully automated inline solution, a walk-up, a side-seal and a small anvil system. Designed for integration into many industries and applications, the SGP features stainless steel options. The SGP walk-up machine is the perfect, reliable and all around strapping system for small to large packed goods. High performance, easy to operate and always ready for any production volume.

SAMUEL P702

The Samuel Strapping Systems P702 is a world class high speed automatic strapping machine that is known to be the most operator friendly machine in its class. The compact frame of the P702-59 features an inside mount strap dispenser that hinges up for auto strap loading at waist height. They also feature quick release feed guides for immediate access to the strap feed system with the need for tools.

WULFTEC VARIOMASTER 9471

Automatic high performance strapping machine for full pallet loads. For integration in powered conveyor line. The strapping head is positioned horizontally above the load and, as part of the strapping cycle, will be lowered towards the load to be strapped. The bottom section of the strapping arch can be a standard undertrack style, or an electric motor driven pallet bayonet for "through-pallet" strapping, or a combination of both.

SAMUEL 415-G1

The Samuel 415-G1 is a high performance machine that features DC brushless motor technology. It has precision electronic tension up to 180 Lbs with auto strap loading at waist height, anti jam technology and a fast 50 straps per minute speed. The 415-G1 is both compact in its frame and fast enough for many packing needs in an efficient design.
