- 3-speed, 1 phase, 115V ball bearing motor
- Standing fan rolls on 5" hard rubber wheels.
- Meets OSHA standards.

Item Code #LS2852 (12"), #LS2853 (18"), #LS2854 (18" Stand)

## HIGH VOLUME LOW SPEED FANS

- Large diameter blades deliver a cooling circulation
- Indoor use only • Silent operation reduces motor noise
- Designed to perform, built to last, easy to install, efficient to operate, affordably priced - these fans will have you covered from floor to ceiling.

Each overhead fan is controlled by an inverter that allows for three power input options and variable output control of the fan speed. IP55 rated for industrial environments. The unit comes standard with a 5' down rod, mounting hardware and safety cables. Additional down rod extensions are available - please call for details. Electrical service will be required at the ground level control panel. Lifetime warranty on the hub and blades with a non-prorated warranty on the whole fan for 3 years. FOB Shipping Point.

Please call for custom applications and down rod extension options along with pricing options!
